WORK EXPERIENCE

UX/UI Designer & Frontend Developer | TechNeat Info Solutions

Apr 2025-Present

- Designed **15+ web and mobile applications** with user research, wireframes, and high-fidelity UI.
- Developed **Figma designs into responsive frontend interfaces** using HTML5, CSS3, Bootstrap, JavaScript, and React (Basic), Hugo maintaining pixel-perfect implementation across multiple devices.
- Collaborated with **clients and developers** to deliver user-centered digital solutions.
- Built **design systems, reusable UI components, and responsive layouts** for consistency.
- Improved **usability, accessibility, and frontend performance** through UX enhancements.

PROJECTS

Tymli Health – Healthcare Record Management Platform

- Conducted **user research** to understand patient needs and digital healthcare workflows.
- Category-based document upload and organization workflows for **easy record management**.
- Designed intuitive **UI for OCR-based medical report** scanning and AI-generated summaries for easy understanding.
- Designed secure medical record sharing flows, enabling seamless **collaboration between patients and doctors**.
- Designed a **daily step tracking feature** to help users monitor their physical activity.

NeoBase – Investment Platform

- Researched investment platform workflows, crowdfunding systems, and **Web2 vs. Web3 technologies** to understand modern fintech ecosystems.
- Gained knowledge of **blockchain**, **wallet-based authentication**, and KYB/KYC verification for business and investor onboarding.
- Explored campaign creation, **POS integration**, revenue tracking, payout automation, and business dashboard workflows.
- Created user flows, wireframes, high-fidelity UI designs, and **interactive prototypes** in Figma based on research insights.
- **Collaborated with developers** to deliver intuitive business and investor experiences while maintaining design consistency.

JMR iFarms – Smart Vertical Farming Website

- **Designed and developed** a responsive product showcase website to present the JMR iFarms smart vertical farming machine with a modern and user-friendly interface.
- Created an intuitive **information architecture** and user flow to clearly communicate the machine's features, benefits, and technology, improving the overall user experience.
- Delivered a **pixel-perfect, responsive website** that aligned with the client's vision, resulting in positive client feedback and successful project delivery.
